Re: Notice of Proposed Decision - Minor Title V Permit Modification F-01059-6

Dear Mr. Rios:

Enclosed for your review and comment are the District's proposed revised Title V operating permit F-01059-6, Statement of Basis Addendum, and Authority to Construct (ATC) for Recology Hay Road. The landfill is located at 6426 Hay Road in Vacaville, California. This notification is given in accordance with District Rule 3.8, Section 409.2 for a minor Title V permit modification.

The proposed revision is necessary due to an application for Authority to Construct (ATC) C-10-34. The application proposes to modify P-85-06(a1) to allow for installation of an enclosed flare (previously noticed under F-01059-5), and revision of SOx limits due to more information on the H2S content of the landfill gas. Enclosed are copies of the District's engineering evaluation and proposed ATC for this project.

ATC application C-10-34 has been processed in accordance with the District's Enhanced New Source Review (NSR) requirements of District Rule 3.4, Section 404. Upon implementation of the District ATC, Recology shall submit a written request for District action to amend the Title V permit, in accordance with District Rule 3.8, Section 404.1.

If you have any questions, please contact Courtney Graham, Associate Air Quality Engineer at (530) 757-3655.

Sincerely,

Susan K. McLaughlin
Supervising Air Quality Engineer
